

The Simple Guide to Myasthenia Gravis Treatment and Related Conditions: A Comprehensive Resource for Patients and Families

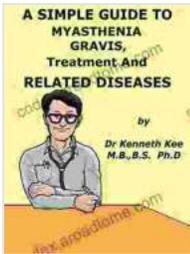

Myasthenia Gravis

What is Myasthenia Gravis?

Myasthenia gravis is a rare autoimmune disorder that affects the muscles. It is caused by a defect in the way the body's immune system communicates with the muscles. This defect leads to muscle weakness and fatigue. Myasthenia gravis can affect people of all ages, but it is most common in women between the ages of 20 and 40.
